

# Math

## 22 QUESTIONS

### DIRECTIONS

The questions in this section address a number of important math skills.  
Use of a calculator is permitted for all questions.

### NOTES

Unless otherwise indicated:

- All variables and expressions represent real numbers.
- Figures provided are drawn to scale.
- All figures lie in a plane.
- The domain of a given function  $f$  is the set of all real numbers  $x$  for which  $f(x)$  is a real number.

### REFERENCE

$$A = \pi r^2$$

$$C = 2\pi r$$

$$A = \ell w$$

$$A = \frac{1}{2}bh$$

$$c^2 = a^2 + b^2$$

Special Right Triangles

$$V = \ell wh$$

$$V = \pi r^2 h$$

$$V = \frac{4}{3}\pi r^3$$

$$V = \frac{1}{3}\pi r^2 h$$

$$V = \frac{1}{3}\ell wh$$

The number of degrees of arc in a circle is 360.

The number of radians of arc in a circle is  $2\pi$ .

The sum of the measures in degrees of the angles of a triangle is 180.

**For multiple-choice questions**, solve each problem, choose the correct answer from the choices provided, and then circle your answer in this book. Circle only one answer for each question. If you change your mind, completely erase the circle. You will not get credit for questions with more than one answer circled, or for questions with no answers circled.

**For student-produced response questions**, solve each problem and write your answer next to or under the question in the test book as described below.

- Once you've written your answer, circle it clearly. You will not receive credit for anything written outside the circle, or for any questions with more than one circled answer.
- If you find **more than one correct answer**, write and circle only one answer.
- Your answer can be up to 5 characters for a **positive** answer and up to 6 characters (including the negative sign) for a **negative** answer, but no more.
- If your answer is a **fraction** that is too long (over 5 characters for positive, 6 characters for negative), write the decimal equivalent.
- If your answer is a **decimal** that is too long (over 5 characters for positive, 6 characters for negative), truncate it or round at the fourth digit.
- If your answer is a **mixed number** (such as  $3\frac{1}{2}$ ), write it as an improper fraction ( $\frac{7}{2}$ ) or its decimal equivalent (3.5).
- Don't include **symbols** such as a percent sign, comma, or dollar sign in your circled answer.

Question

Store A sells raspberries for **\$5.50** per pint and blackberries for **\$3.00** per pint. Store B sells raspberries for **\$6.50** per pint and blackberries for **\$8.00** per pint. A certain purchase of raspberries and blackberries would cost **\$37.00** at Store A or **\$66.00** at Store B. How many pints of blackberries are in this purchase?

Answer

- A. **4**
- B. **5**
- C. **8**
- D. **12**

Question ID: cf2be18d

| Assessment | Test | Domain                            | Skill                                                              | Difficulty                                        |

Question

$a, 26, 29, b, 31, 47, c$

For the given data set, the data values are listed in ascending order, where  $a$ ,  $b$ , and  $c$  are constants. For this data set, the mean is **36**, the median is **29**, and the range is **72**. What is the value of  $c$ ?

Answer

- A. **54**
- B. **72**
- C. **81**
- D. **98**

Question ID: 9f2ecade

| Assessment | Test | Domain        | Skill               | Difficulty                               |

| SAT        | Math | Geometry and Trigonometry | Circles | Hard <div></div> <div></div> <div></div> |

Question

$$x^2 + x\sqrt{t} + y^2 - y - 65 = 0$$

The given equation, where  $t$  is a constant, defines a circle in the  $xy$ -plane. The radius of this circle is  $\sqrt{83}$ . What is the value of  $t$ ?

Answer

- A. 73
- B. 71
- C. 37
- D. 35

Question ID: 45cfb9de

| Assessment | Test | Domain  | Skill                                       | Difficulty                                        |

Question

Adam’s school is a 20-minute walk or a 5-minute bus ride away from his house. The bus runs once every 30 minutes, and the number of minutes,  $w$ , that Adam waits for the bus varies between 0 and 30. Which of the following inequalities gives the values of  $w$  for which it would be faster for Adam to walk to school?

Answer

- A.  $w - 5 < 20$
- B.  $w - 5 > 20$
- C.  $w + 5 < 20$
- D.  $w + 5 > 20$

| Assessment | Test | Domain                            | Skill                                   | Difficulty                                        |

| SAT        | Math | Problem-Solving and Data Analysis | Probability and conditional probability | Hard <div><div></div><div></div><div></div></div> |

Question

|               | Blood type |   |    |    |
|---------------|------------|---|----|----|
| Rhesus factor | A          | B | AB | O  |
| +             | 33         | 9 | 3  | 37 |
| −             | 7          | 2 | 1  | x  |

Human blood can be classified into four common blood types—A, B, AB, and O. It is also characterized by the presence (+) or absence (−) of the rhesus factor. The table above shows the distribution of blood type and rhesus factor for a group of people. If one of these people who is rhesus negative (−) is chosen at random, the probability that the person has blood type B is  $\frac{1}{9}$  . What is the value of x ?

| Assessment | Test | Domain        | Skill                  | Difficulty                               |

Question

Which of the following is equivalent to  $\left(a + \frac{b}{2}\right)^2$  ?

Answer

A.  $a^2 + \frac{b^2}{2}$

B.  $a^2 + \frac{b^2}{4}$

C.  $a^2 + \frac{ab}{2} + \frac{b^2}{2}$

D.  $a^2 + ab + \frac{b^2}{4}$

Question

A model estimates that at the end of each year from **2015** to **2020**, the number of squirrels in a population was **150%** more than the number of squirrels in the population at the end of the previous year. The model estimates that at the end of **2016**, there were **180** squirrels in the population. Which of the following equations represents this model, where *n* is the estimated number of squirrels in the population *t* years after the end of **2015** and  $t \leq 5$ ?

Answer

- A.  $n = 72(1.5)^t$
- B.  $n = 72(2.5)^t$
- C.  $n = 180(1.5)^t$
- D.  $n = 180(2.5)^t$

Question ID: fecc446d

| Assessment | Test | Domain                    | Skill                        | Difficulty                               |

| SAT        | Math | Geometry and Trigonometry | Lines, angles, and triangles | Hard <div></div> <div></div> <div></div> |

Question

A line intersects two parallel lines, forming four acute angles and four obtuse angles. The measure of one of these eight angles is  $(7x - 250)^\circ$ . The sum of the measures of four of the eight angles is  $k^\circ$ . Which of the following could NOT be equivalent to  $k$ , for all values of  $x$ ?

Answer

- A.  $-14x + 1,540$
- B.  $14x - 320$
- C.  $-28x + 1,720$
- D.  $360$

Question ID: 55ea82f3

| Assessment | Test | Domain  | Skill                                       | Difficulty                                        |

Question

A team hosting an event to raise money for new uniforms plans to sell at least **140** tickets before this event and at least **220** tickets during this event to raise a total of at least **\$5,820** from all tickets sold. The price of a ticket during this event is **\$3** less than the price of a ticket before this event. Which inequality represents this situation, where  $x$  is the price, in dollars, of a ticket sold during this event?

Answer

- A.  $140(x + 3) + 220x \leq 5,820$
- B.  $140(x + 3) + 220x \geq 5,820$
- C.  $140(x - 3) + 220x \leq 5,820$
- D.  $140(x - 3) + 220x \geq 5,820$

| Assessment | Test | Domain        | Skill                                                                         | Difficulty                                        |
|------------|------|---------------|-------------------------------------------------------------------------------|---------------------------------------------------|
| SAT        | Math | Advanced Math | Nonlinear equations in one variable and systems of equations in two variables | Hard <div><div></div><div></div><div></div></div> |

Question

$y = x^2 + 2x + 1$

$x + y + 1 = 0$

If  $(x_1, y_1)$  and  $(x_2, y_2)$  are the two solutions to the system of equations above, what is the value of  $y_1 + y_2$ ?

Answer

- A.  $-3$
- B.  $-2$
- C.  $-1$
- D.  $1$
